contact information

LabWare LIMS is the leading customer-configurable LIMS, with a wide variety of modules that seamlessly extend the application's flexibility to address the needs of specific market segments, allowing the software to integrate into any corporate computing environment. The software architecture provides smooth and consistent scalability from small systems all the way to enterprise-class, multi-tiered environments. "Configure Once, Deploy Anywhere™" technology means users don't have to compromise between a rich client, thin client or a zero footprint, 100 percent pure Web-based interface.

Getting Results from the Web

the opportunity

The internet is changing the way we all do business – including laboratories – giving us new opportunities to get closer to our customers and to deliver ever faster and better services.

In addition, organisations require to address the diverse needs of QA/QC, R&D, Equipment Management, Out of Specification Management, Environmental Monitoring and Stability, etc. without a plethora of IT systems.

the way forward

We will demonstrate how LabWare's clear vision and evolutionary approach enable us to continuously add LIMS functionality and embrace new technologies – including the web – whilst allowing our clients to maintain full compatibility with their current investment.

who should attend?

Directors, managers and senior staff responsible for laboratory systems, product quality, regulatory compliance and strategic IT solutions, including:

- Laboratory Managers - QA/QC and R&D
- Production Quality and R&D Directors
- Quality and System Validation Specialists
- IT Directors and Senior LIMS Administrators

agenda

09.30 Registration

10.00 Welcome

10.10 Expand Your Laboratory's Horizons!

Innovative solutions for Manufacturing, R&D, Environmental and Analytical Testing

10.45 Benefit Opportunities & Business Drivers
