LabWare LIMS is the leading customer-configurable LIMS, with a wide variety of modules that seamlessly extend the application's flexibility to address the needs of specific market segments, allowing the software to integrate into any corporate computing environment. The software architecture provides smooth and consistent scalability from small systems all the way to enterprise-class, multi-tiered environments. "Configure Once, Deploy Anywhere™" technology means users don't have to compromise between a rich client, thin client or a zero footprint, 100 percent pure Web-based interface.

Keynote Speaker - Dr Dave Watson
Programme Director - IBM UK

Abstract

The IT industry has a tremendous record of innovation and just when you thought it could be slowing down there is a massive injection of new ideas and technology. The talk will concentrate on what is coming in the IT world and relate future developments to clinical laboratories.

I will cover a wide range of topics in the IT field, from processors and massively parallel machines, to grid computing, from networking bandwidth, to pervasive computing. Drawing on examples of real client projects and research work underway in a wide range of areas the talk will provide a balanced view of where IT R&D is heading, and what possibilities this opens up for novel applications of new technology. The last few years have shown pointers towards a more mature industry, with more agreement on workable, flexible, open standards but much remains to be done if the potential for life enhancing IT is to be reached.

Biography

Dr Dave Watson is Programme Director of the Emerging Technology Department at IBM's Hursley Laboratory in Hampshire. His main interest is in bringing new software technologies to market by working closely with customers and IBM Research and Development teams worldwide. The current technology foci in his area are: Grid Computing, Text Mining, Pervasive Computing and Life Sciences. Dave is a strong supporter of the UK e-Science Programme and has teams working full-time on major projects such as OGSA-DAI and eDiamond in collaboration with Universities across the UK. His technical background is in computer graphics, image processing, and data visualization.

LabWare LIMS Seminar

Enterprise LIMS Making the Right Choice

Including keynote talk from Dr Dave Watson of IBM UK

The Gallery, Vinopolis, Bank End, London
Monday 6th September 2004

Includes
"Wine Tour!"

Enterprise LIMS - Making the Right Choice

the opportunity

The Internet and new integration technologies are changing the way we all do business giving us new opportunities to get closer to our customers and to deliver ever faster and better services.

Laboratory Information Management Systems (LIMS) are increasingly considered to be mission critical applications underpinning the success of your company in all areas of the business. Choosing the right LIMS partner is key to this success.

the way forward

We will explain how LabWare's clear vision, leading-edge technology and evolutionary approach has enabled our customers to harness the benefits of deploying a single LIMS product across the enterprise.

who should attend?

Directors, managers and senior staff responsible for laboratory systems, product quality, regulatory compliance and strategic IT solutions. The seminar will focus on core issues facing all businesses and will not be industry specific.

agenda

09.30 Registration

10.00 Welcome

10.10 Keynote Presentation - Dr Dave Watson, IBM

10.50 Choosing the Right Technology Partner

11.20 Break

11.40 LIMS Solutions for the Enterprise

Including solutions for Manufacturing, R&D, Environmental and Analytical Testing

12.30 Lunch

13.45 Deploying an Enterprise LIMS

Deployment Technologies Briefing

14.30 Enterprise Integration and LIMS

The Benefits of Interfacing LIMS with ERP, Process Control, Document Management Systems, etc.

15.15 Break

15.30 Solution Demonstrations

16.30 Close

17.00 Vinopolis Tour and Wine Tasting
