The Pursuit of Perfection

The job you do says it all. You are an explorer. The search to discover a better way, a more effective solution, a major breakthrough, is second-nature to you. You know that if you could enhance the ability of the many applications within your organisation to communicate with each other, you could transform the way you work. You recognise that each of the functions within your organisation – QA/QC, R&D, Equipment Management, Out of Specification Management, Environmental Monitoring and Stability, etc - has unique needs. Yet you question whether a plethora of IT systems is the only way to satisfy these needs.

The Way Ahead

Because you seek a better way, you will want to explore the ground-breaking Laboratory Information Management System (LIMS) created by LabWare. It isn't just the ability of this software to integrate instruments and applications that will impress you, enabling you to share vital knowledge, achieve compliance more effectively and reduce paperwork. It is the fact that you can maintain full compatibility with your current investment whilst adding functionality and embracing new technologies, including the web.

Join us on the Journey

We are inviting a select group of people to a series of highly-focused roadshows. Like you, they will be the directors, managers and senior staff responsible for laboratory systems, product quality, regulatory compliance and strategic solutions. If your job function falls within the following categories, you are eligible to apply for one of the limited places.

- Laboratory Managers – QA/QC and R&D
- Production Quality and R&D Directors
- Quality and System Validation Specialists
- IT Directors and Senior LIMS Administrators.

The Dates

Limited places available on:

20th April 2005

Carlton President,
Utrecht, Netherlands

21st April 2005

Holiday Inn,
Gent EXPO, Belgium

Software shaped by a deep understanding of your needs.

Event Agenda

- 09.30 Registration**
- 10.00 Welcome**
- 10.10 Gaining the Advantage**
Highlighting how the advanced features of LabWare LIMS bring substantial benefits to our customers.
- 10.50 Much more than a LIMS**
Benefits for laboratories in various industries through integration of instrumentation and applications.
- 11.30 Break**
- 11.45 Deploying an Effective LIMS**
Covering deployment options using LabWare's Visual Workflows over the Web, PDA and Rich Client.
- 12.30 Lunch**
- 13.30 Supporting Demonstration**
Demonstrating practical solutions of the various items presented today.
- 14.15 Summary & Discussion**
- 14.30 Close**

More Laboratories Achieve Outstanding Value from LabWare LIMS.

LabWare LIMS is a leading customer-configurable LIMS, with a wide variety of modules that seamlessly extend the application's flexibility to address the needs of specific market segments, allowing the software to integrate into any corporate computing environment.

The software architecture provides smooth and consistent scalability from small systems all the way to enterprise-class, multi-tiered environments.

'Configure Once, Deploy Anywhere' technology means users don't have to compromise between a rich client, thin client or a zero footprint, 100 percent pure Web-based interface.
